

S2 Fig. Box-whisker plots of a few selected most significant metabolites between the wild type and the mutants in the absence of propranolol. (A) *P. putida* DOT-T1E is the wild type, (B) *P. putida* DOT-T1E-PS28, and (C) *P. putida* DOT-T1E-18. Variables 9 (unknown), Variables 29 (leucine), Variables 37 (leucine⁺), Variables 70 (unknown), Variables 134 (α -D-glucopyranoside*), Variables 163 (D-ribonic acid/ D-glucose*), Variables 185 (α -N-acetylneurameric acid/ D-Glucose*), Variables 188 (sucrose), and Variables 198 (α -N-acetylneurameric acid*).

⁺ multiple derivatives of same compound *multiple assignments as identification is putative only
